Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 12-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention..

As to claim 2, the specification only discloses fingers on the insert and cutouts on the socket as shown in fig. 1.

Claims 2 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, "the lower end of the insert member or socket member" and "the base of the socket member or the in insert member" lack a proper antecedent basis. More particularly a lower end is not previously recited on the socket member and no base has been previously recited on the insert member. Claim 7 is indefinite in that the structure of something that is a "dual durometer material" is not clear. As to claim 16, "the fingers of the insert member" lack a proper antecedent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldman 5,118,106.

As to claims 1-3 and 9-16, Goldman shows a socket member 20 with tracks 25 and an insert member with fingers 27 extending from a reduced diameter hub 45 .

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3711

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 -5, 9-14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldman in view of Natoli 4,029,953.

As to claims 3, 9-14 and 16, twist and lock mechanisms for securing elements together using a cam surface having a track are known. Natoli teaches that it would have been obvious to have replaced elements 25 and 27 of Goldman with fingers that cooperate with compatible tracks as an obvious matter of replacing one known locking means with that of another. Notches 80 are considered to be taught as called for in claims 4 and 5

Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldman in view of Natoli and further in view of Immen 712,192 .

Immen teaches that it would have been obvious to have place a rubber lining like his element f on an insert like the one shown by Goldman in order to improve the grip.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Alberts, Arsenault and Haza show ball inserts.
